

## **Things I love about my home:**

- ♥ The openness of the floor plan for the Great Room and all the windows.
- ♥ The custom kitchen with the dual wall oven that has ball bearing racks that just glide out and the 5-burner gas stove with pop-up venting.
- ♥ Big refrigerator with bottom freezer, dual doors on top to store that pizza easy.
- ♥ The look of the Custom knotty pine cabinets which allow you to show things on top, with rope lighting along the edging. Also both the cabinets and drawers will not slam no matter how hard you shut them.
- ♥ The microwave is not just a microwave, it is a Advantium wall oven which give you much more cooking abilities.
- ♥ The hard wood flooring – it is Douglas saw cut out of Clancy – you cannot hurt the floor and you can go weeks without mopping. It is very durable.
- ♥ All the knotty pine custom doors and trim.
- ♥ The large guest bedrooms with big windows.
- ♥ The laundry room has it's own sink and even a ironing board on the wall. Also in the laundry room is a door that gives you access to all the wiring to the back of the TV – very nice feature.
- ♥ The extra large walk-in closet off the main bedroom, and the Jacuzzi tub.
- ♥ The basement has a huge family room/party room with a very nice picture window that gives you a good view of the back lawn. You can watch the deer real close and they don't notice you. Also the door to the outside in the basement has a keyless entry so you have a way into the house even when you lock yourself out.
- ♥ The deck!! It is nice and wide, 50' long which gives you plenty of room to see the lake and great views of the mountains around.
- ♥ The shop between the house and garage is just that – a very good sized room with it's own bathroom, counter space, cupboards, utility sink and it has it's own garage door (manual) in there to move those big items in to work on.
- ♥ The garage is certainly big enough for 2 big vehicles and there is extra storage space above the front of the cars.
- ♥ All of the windows are top down/bottom up as are the window blinds – very nice feature when it comes time to cleaning and letting all the fresh air in.
- ♥ The front door – I love how you can open the 2 side doors with screens to let the fresh air in and still keep the main door closed.
- ♥ All of the views!! Every window you look out has a great views of the mountains and any of the wildlife that may be grazing out there.
